RE: Port Alma Wind Power Project

Kruger Energy Port Alma Limited Partnership ("KEPA") is proposing to construct a wind power project in the Municipality of Chatham-Kent in the geographic townships of Romney, Tilbury East, and Raleigh.

The project was initiated in response to the second Request for Proposals (RFP) issued by the Government of Ontario in June 2005. The Port Alma Wind Power Project will be designed to generate 101.2 megawatts (MW) of power using 44 wind turbines.

KEPA has retained Stantec Consulting Ltd. ("Stantec"), an environmental consulting firm, to prepare an Environmental Screening Report ("ESR"), as required by provincial and federal Environmental Assessment Acts.

To learn more about this project, and to provide your input to the planning process, you are invited to an Open House at:

When: April 19, 2006
Time: 4:00 to 8:00 p.m.
Where: Merlin Community Hall
150 Aberdeen Street
Merlin, ON

The Public Open House will provide the opportunity for interested people to review the project concept, environmental screening process, and general planning constraints, as well as to provide comments to the project team. We hope that you will attend the Open House, but if you are not able to join us, as always, we welcome your input. To provide the study team with your comments or for further information, please call our toll-free project information line at **1-866-599-9024** or e-mail us at kepawind@kruger.com.
